About us

We are global

GWP has been known as Europe's leading supplier of wood and wood-based products

For many years, GWP has been known as Europe's leading supplier of wood and wood-base products. With good reason: 4 generations with experience in the lumber industry have given us a solid understanding of markets. GWP has long-term relationships at every link in the supply chain, from forest and sawmills to final processing, based on trustworthiness and personal customer service. GWP costumers can get everything from a single source.

Why do business with us?

1 We prioritize a culture of honesty, trust and reliability.
You can count on us.

2 Quality.
We are proud of our GWP brand and the emphasis on quality control that it represents.

3 Empowerment.
Our company culture discourages bureaucracy and emphasizes entrepreneurial initiative.

4 Commitment and work ethic.
Our people are engaged and will work hard to help you.

5 Relationship.
We view ourselves as your partners. Our definition of success is helping you to achieve yours.

6 Ecology.
We believe that through sustainable management, rainforests can be preserved and continue to support both local communities and wildlife in their natural habitat.

Sustainable World

No Forest, no Future

Responsibility to Forest Ecosystem

Sustainability

Do what you love, and love what you do.
One way to show it is by supporting the
protection of forests and the communities
that depend on them.

That's why we established our programs
to verify timber legality through a chain of
custody auditing process from the forest
floor to your door.

We are FSC® certified

Contributing to the Sustainability of the Forests:
The Importance of Specifying Certified or Legally
Harvested Timber-Based Products.

Asking for certified or legally-derived timber products might seem a small gesture but it will raise greater awareness on the importance of our forest and why we must manage it properly so that it remains healthy and productive for generations to come. Make the responsible choice. Choose GWP.

Responsible Procurement

We employ a clear work method and structure, which captures and follows all the needed evidence to comply with EUTR (EU) , UK Environment Act (United Kingdom), Lacey Act (USA), EPBC ACT REFORM (Australia), The Basic Environmental Law (Japan) and others.

Third Independent Party Verification

GWP has third party checks for the legality of its products and complies with numerous quality marks and requirements.

Authenticity, consistency of all information and documents are thoroughly checked as well as the official status of all the companies involved.

Sustaining Forests and Supporting Communities

Wood is Good

The Nature of Wood

Wood is Good

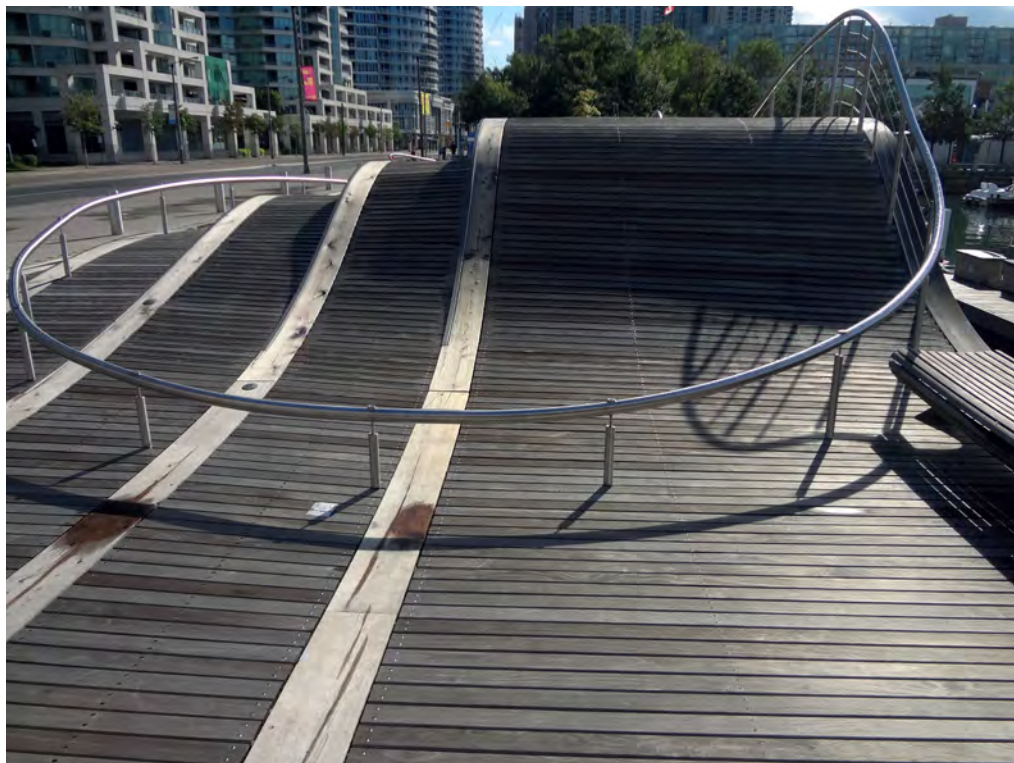

Wood has been associated with man since time immemorial. Unfortunately, many architects, builders, contractors and specifiers shy away from using wood because of their lack of understanding of the material and the common myths and fallacies associated with wood.

One fundamental aspect of wood that must be understood is that it is a biological material and therefore subject to environmental factors that influence its formation and growth. This makes wood variable, i.e., with different densities and technical properties, so no two pieces of wood are similar. Once this tenet is understood, wood becomes a more accommodating material, lending itself to a huge variety of uses and applications, largely due to its ability to fulfil both form-and-function requirements.

The Nature of Wood

Wood is...

- >a Biological Material
- >Anisotropic
- >Hygroscopic
- >Inert

Positive Attributes of Wood

- > Strength
- > Durability
- > Acoustic Properties
- > Excellent Insulator

Positive Attributes of Wood

- > Sustainable
- > Performance in Fire
- > Versatility
- > Energy Efficient

The 'Green' Credentials of Wood

- > Carbon Sequestration
- > Carbon Locking
- > Recyclability
- > Climate Change Mitigation

Quality

Quality is not a single act, it is a habit

European Precision
Made in South America

**Take the European precision.
Add our 60 year experience in South America.**

Result: Carefully, crafted, stronger products that are environmentally friendly and high-performance. Grade selection and specification will have a significant impact on both the appearance and performance of wood products in any given application.

GWP procurement personnel are specialists well versed in local conditions and customs. They have in depth knowledge and expertise in sourcing, grading and the preparation of hardwood products. Contract monitoring and quality control play a vital role in eliminating the enormous costs incurred when substandard timber is shipped.

Creating Standards

When tropical hardwoods are specified or purchased without clearly defining grade expectations, there is no assurance of the quality and consistency of the product delivered, and no accountability standard set for the supplier. And since grade affects price, what looks like a good deal on paper might not look nearly as good on your project. If the product is being used in structural applications like decking, grade has a direct impact on mechanical properties and load performance.

In the absence of industry established and defined quality control standards for tropical hardwood decking and lumber GWP has developed and published grading standards and product specification language which we apply to our own decking production and timber products.

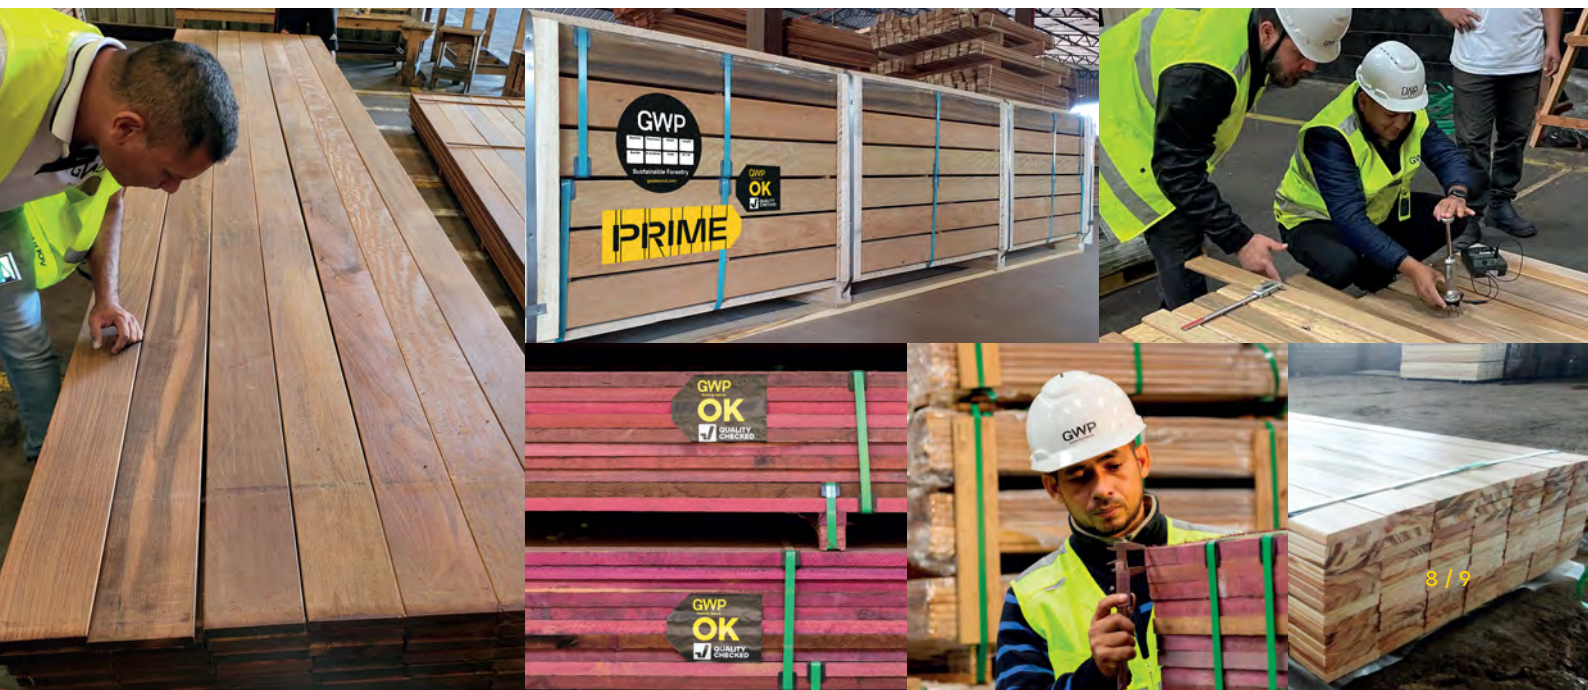

GWP
Wood by Nature

PREMIUM SELECT

PRIME

GWP Prime consists of a handpicked selection of some of the finest lumber nature has to offer.

Each piece of lumber must meet our highest quality and sustainability standards. When you buy GWP Premium, you are bringing the world's finest lumber to your company.

Products

Hardwood Lumber

We like to talk about wood, and we love to work with this natural product

Species

We provide a range of species in standard sizes and grades as well as specific cut to order available for shipment directly from their country of origin, or through our manufacturing and distribution locations.

Get high-quality lumber from around the world for your project. We have more than 40 species of exotic wood from South America paired with an unrivalled respect towards sustainability.

Dimensions

Because of our exclusive sources, we offer an unparalleled selection of lumber in most dimensions and profiles. We ensure timely shipments, competitive prices, and an outstanding experience.

Milling:

- Standard and special patterns
- Small and large orders
- Rough / S2S / S4S / Components / Pattern Stock

Available: 3/4", 4/4", 5/4", 6/4", 7/4", 8/4", 10/4", 12/4", 16/4"
Rough sawn, air-dried, and kiln-dried products. Lumber is available in quarter sawn and plain sawn.

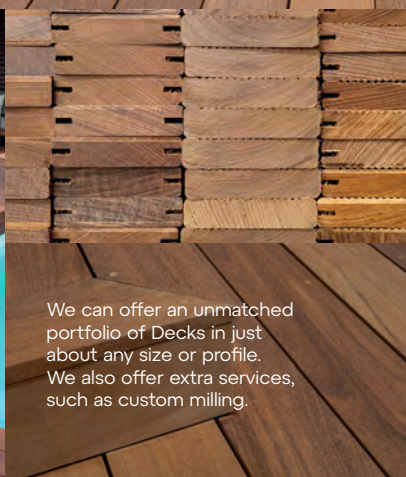

Products

Decking

One of the world's most sustainable building products with a certified harvesting method that put nature and people first

Whether your next project is a commercial installation, backyard deck or town boardwalk, GWP sustainable hardwood product specialist will bring it to life.

We can offer an unmatched portfolio of Decks in just about any size or profile. We also offer extra services, such as custom milling.

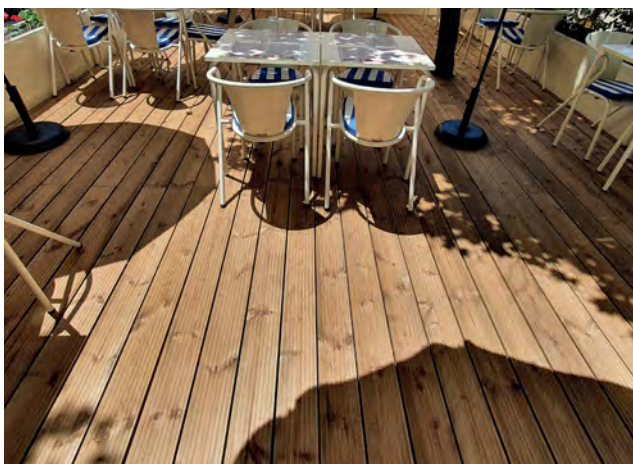

Superior hardwood with sourcing certainty you can build on.

Quality materials create quality projects:

Hardwood

Only the best varieties of hardwood become part of this elite collection.

- Ipe
- Cumaru
- Garapa
- Itaúba
- Purpleheart
- Massaranduba
- Tigerwood
- Garapa
- Jatobá
- Angelim Amargoso
- Angelim Pedra
- Tatajuba
- Guariuba
- Sucupira

Softwood

Softwood decks are a very good choice for your outdoor landscaping. Particularly resistant and non-slip decking boards. Pine offers attractive aesthetics and durability at affordable prices.

- Sylvester Pine Green (C4)
- Sylvester Pine Brown (C4)

Products

WPC – TIMBERDEX

The Premium beauty of Wood with Sustainability, Quality, Innovation and Design

Our innovative top quality industrial process allowed us to create boards that do not rot or warp and is virtually maintenance-free. Our design and production are fully european and our team of experts are ready to support any project you may have.

ECO PRIME
Best

ECO NATURA
Better

ECO TEC 120

Timberdex ECO Series

We offer 3 different deck models, each one of them with different finishings and colors. ECO Prime is our premium model but both ECO Natura and ECO Tec offer high quality for any project.

Premium quality and design

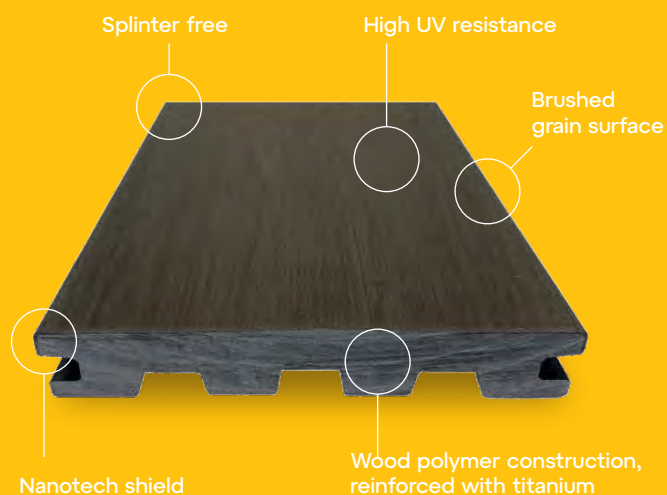

ECO PRIME

High traffic

TIMBERDEX's revolutionary ECO Prime range guarantees you the ultimate wood look and feel, with top quality and high longevity due to its Nanotech Shield.

Width: 150mm **Thickness:** 24mm

Length: 2300/3200mm

Products

Underdecking

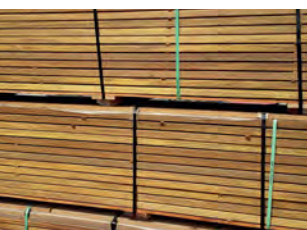

To secure the installation of your terrace and the durability of the structure, the choice of wood for the substructure is essential

Higher resistance make our underdecking ideal for quality wooden terraces.

Available in South American Hardwood species and European Sylvester Pine class IV, Green and Brown.

Several different types of profiles AD/KD production.

Products

Wood Deck Tiles

Easy to install & always affordable. Our deck tiles combine aesthetics, quality and durability

GWP deck Tiles provide a unique solution for the conversion of city streets (for pedestrian use only), Street Decks, rooftops, terraces, in both residential and commercial applications. This product offers a temporary or permanent solution for a variety of functional design needs.

Constructed using Ipê, Cumaru, Massaranduba, Garapa and Itauba the wood tiles vary in length from 20" to 48" and custom sizes and offer design flexibility and easy installation to create beautiful outdoor living areas.

Features:

- > An attractive, dynamic looking surface.
- > All the durability and resilience of long-length hardwood decking
- > 100% All-natural, chemical-free
- > Cost-effective solution for both rooftop and conventional decks
- > Easy installation that take hours, not days.
- > Class 1 durability rating (25 + years in-ground contact)
- > ASTM E84 Class A fire rating and Cal Fire Wildland Urban Interface approval
- > Smooth deck surface to maximize shoe surface area contact/minimize cleaning

Products

Hardwood Trailer Decking

The Premium beauty of Wood with Sustainability, Quality, Innovation and Design

To outfit your fleet you need every detail covered, from durable flooring to tie slats that can go the distance.

GWP can supply different products needed for the transportation industry.

Using your design specs, we can create in Angelim Pedra and Tauari Shiplap Trailer Flooring patterns for all wood floors.

We can also provide Rough Trailer Decking.

We mill Tie down and Side slats in several hardwoods because they're the best at resisting rot and abrasion, which means they reduce the need for repairs.

Shiplap Trailer Flooring

Solid shiplap flooring is typically used in lightweight flatbed trailers where product weight, durability, strength and price are the major concerns for manufacturers.

Rough Trailer Flooring

Angelim Pedra, Jatoba, Ipe, Cumaru, Massaranduba, Purpleheart, just to name a few. Most importantly, tropical hardwoods are by far the best value in the industry when it comes to truck decking and trailer flooring applications.

Tie Down and Side Slats:

S4S boards in tropical woods have an eased edge and used for tie downs or side slats.

A photograph of a rooftop terrace. The foreground is dominated by a wooden deck made of horizontal planks. A glass railing with thin metal posts runs across the middle ground. In the background, a city skyline is visible under a clear blue sky with some wispy clouds. The text "Think Green Think Wood" is overlaid on the left side of the image.
